

Census Information

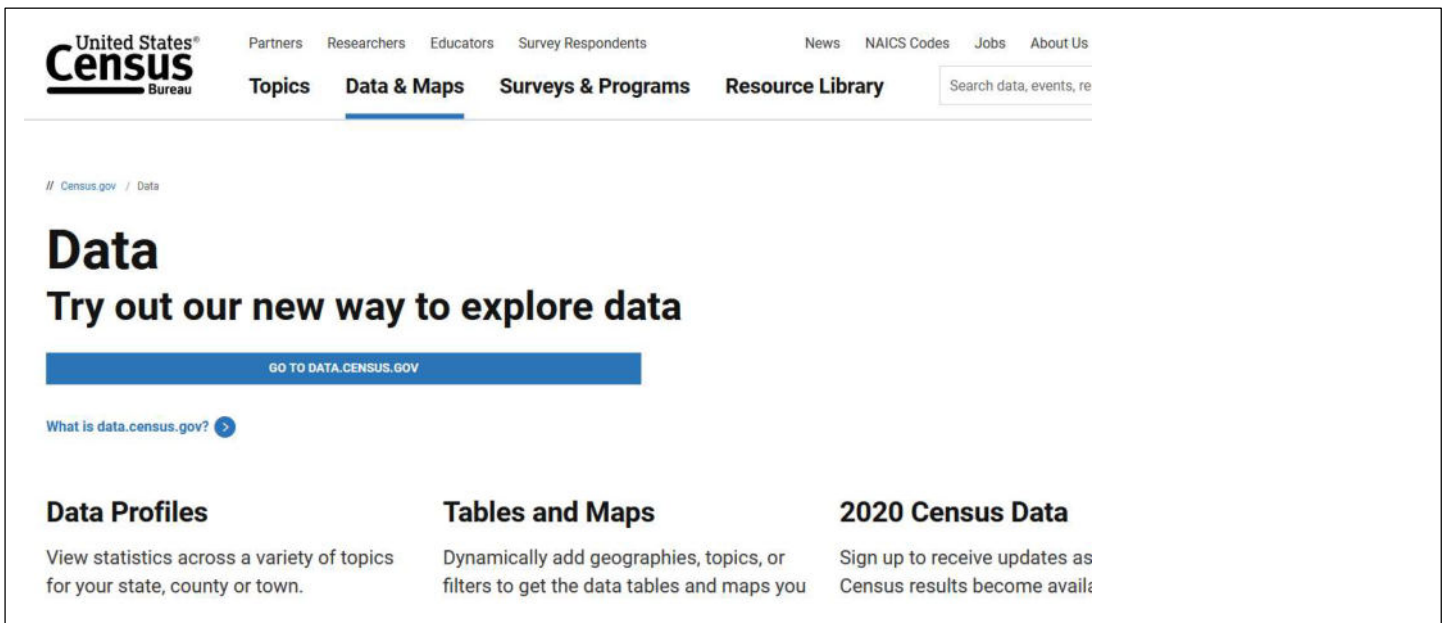

Ever try to figure out how many households in a given area bring in more than \$75,000 annually, or \$100,000, or \$180,000, etc? The US Census provides up-to-date statistics, free for the asking.

Start by visiting <https://www.census.gov/data.html>

Click DATA

Find your state and click on it

From that point you can find household income amounts and how many households are in your city, ages, veterans, dual income households, etc.

A screenshot of the US Census Bureau's "Data" page. The header includes the "United States Census Bureau" logo and navigation links for Partners, Researchers, Educators, Survey Respondents, News, NAICS Codes, Jobs, and About Us. Below the header is a search bar and a menu with "Topics", "Data & Maps" (highlighted), "Surveys & Programs", and "Resource Library". The main content area features the heading "Data" and the subheading "Try out our new way to explore data". A blue button labeled "GO TO DATA.CENSUS.GOV" is prominent. Below this is a link "What is data.census.gov?". The page is divided into three columns: "Data Profiles" (view statistics across a variety of topics for your state, county or town), "Tables and Maps" (dynamically add geographies, topics, or filters to get the data tables and maps you want), and "2020 Census Data" (sign up to receive updates as Census results become available).
